PERGAMON

Computers & Chemical Engineering

An International Journal of Computer Applications in Chemical Engineering

Editor

G. V. Reklaitis, *School of Chemical Engineering, CHME Building 1283, Purdue University, West Lafayette, IN 47907 U.S.A.*

Associate Editors

M. Morari, *Automatic Control Lab, ETH-Z/ETL I29, CH-8092, Zurich, Switzerland*

J. W. Ponton, *Department of Chemical Engineering, University of Edinburgh, King's Building, Mayfield Road, Edinburgh EH9 3JL, U.K.*

Editorial Advisory Board

G. Blau
Indianapolis, Indiana

H. Britt
Cambridge, Massachusetts

G. Buzzi-Ferraris
Milan, Italy

J. Cerda
Santa Fe, Argentina

K. S. Chang
Kyungbuk, Korea

B.-z. Chen
Beijing, China

M. Doherty
Amherst, Massachusetts

T. F. Edgar
Austin, Texas

I. E. Grossmann
Pittsburgh, Pennsylvania

I. Hashimoto
Kyoto, Japan

T. Hertzberg
Trondheim, Norway

K. Joulia
Toulouse, France

M. Kubiček
Prague, Czech Republic

J. MacGregor
Ontario, Canada

R. L. Motard
St. Louis, Missouri

J. Perkins
London, England

R. G. H. Prince
Sydney, Australia

L. C. Puigjaner
Barcelona, Spain

R. W. H. Sargent
London, England

J. D. Seader
Salt Lake City, Utah

W. D. Seider
Philadelphia, Pennsylvania

M. Shacham
Beer Sheva, Israel

J. Siirola
Kingsport, Tennessee

G. Stephanopoulos
Cambridge, Massachusetts

W. E. Stewart
Madison, Wisconsin

T. Umeda
Chiba, Japan

A. W. Westerberg
Pittsburgh, Pennsylvania

Subscription Rates

Annual Institutional Subscription Rates 1998: Europe, The CIS and Japan 2905 Dutch Guilders. All other countries US$1670, Associated Personal Subscription rates are available on request for those whose institutions are library subscribers. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.
Any enquiry relating to subscriptions should be sent to:

The Americas: Elsevier Science Customer Support Department, P.O. Box 945, New York, NY 10010, U.S.A. [Tel: (+ 1)212-633-3730/1-888 4ES-INFO. Fax: (+ 1) 212-633-3680. E-mail: usinfo-f@elsevier.com].

Japan: Elsevier Science Customer Support Department, 9-15 Higashi-Azabu l-chome, Minato-ku, Tokyo 106-0044, Japan [Tel: (+ 3) 5561-5033. Fax: (3) 5561-5047, E-mail: info@elsevier.co.jp].

Back Issues

Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1992–97. Earlier issues are available in high quality photo-duplicated copies as complete volumes only.

PERIODICALS POSTAGE PAID AT RAHWAY, NEW JERSEY. **Computers and Chemical Engineering (ISSN 0098-1354)** is published **13 times per year: monthly with one supplement issue,** by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. The annual subscription in the U.S.A. is US$1670. **Computers and Chemical Engineering** is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, New Jersey 07111-1105. POSTMASTER: Please send address corrections to **Computers and Chemical Engineering,** c/o Elsevier Science, RSO, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A. [Tel: (+ 1) 212-633-3730/1-888 4ES-INFO. Fax: (+ 1) 212-633-3680. E-mail: usinfo-f@elsevier.com].

LIST OF CONTENTS

NUMBER 1–2

W. R. Johns and **H. A. Preisig**	1	Introduction
R. W. H. Sargent	31	A functional approach to process synthesis and its application to distillation systems
A. A. Brice and **W. R. Johns**	47	Optimization of flowsheet drawing layout using a genetic algorithm
S. Tan and **R. S. H. Mah**	69	Evolutionary design of noncontinuous plants
L. Puigjaner and **A. Espuna**	87	Prospects for integrated management and control of total sites in the batch manufacturing industry
M. Hofmeister	109	BatchKit—A knowledge integration environment for process engineering
M. G. Zentner, A. Elkamel, J. F. Pekny and **G. V. Reklaitis**	125	A language for describing process scheduling problems
M. M. Daichendt and **I. E. Grossmann**	147	Integration of hierarchical decomposition and mathematical programming for the synthesis for process flowsheets
D. E. Ravemark and **D. W. T. Rippin** (Deceased)	177	Optimal design of a multi-product batch plant
D. Ruppen, D. Bonvin and **D. W. T. Rippin** (Deceased)	185	Implementation of adaptive optimal operation for a semibatch reaction system
P. Terwiesch, D. Ravemark, B. Schenker and **D. W. T. Rippin** (Deceased)	201	Semi-batch process optimization under uncertainty: Theory and experiments
R. Dumpelmann and **A. Baiker**	215	Concentration controlling for recycle and continuous stirred tank reactors
F. Gross, E. Baumann, A. Geser, D. W. T. Rippin (Deceased) and **L. Lang**	223	Modelling, simultation and controllability analysis of an industrial heat-integrated distillation process
K. Edwards, T. F. Edgar and **V. I. Manousiouthakis**	239	Kinetic model reduction using genetic algorithms
P. L. Speddings and **R. M. Spencer**	247	Simulation of packing density and liquid flow fixed beds II Voronoi polyhedra studies
R. Zenhausern and **D. W. T. Rippin** (Deceased)	259	Modelling and simulation of multicomponent nonlinear chromatography
J. Rehacek, M. Kubicek and **M. Marek**	283	Periodic quasiperiodic and chaotic spatiotemporal patterns in a tubular catalytic reactor with periodic flow reversal

B. Ozyurt, A. K. Sunol, M. C. Camurdan, P. Mogili and **L. O. Hall** 299 Chemical and fault diagnosis through a hybrid symbolic-connectionist machine learning approach

M. Shacham, N. Brauner and **M. Pozin** 323 Comparing software for interactive solution of systems of nonlinear algebraic equations

NUMBER 3

K. V. Camarda and **M. A. Stadtherr** 333 Frontal solvers for process engineering: local row ordering strategies

F. Salim and **D. Depeyre** 343 Comparison between dynamic behaviour of a batch packed and plate column

S. M. Agena, I. D. L. Bogle and **A. R. Cornish** 351 Process synthesis for particle separations using centrifuges

T. Westerlund, H. Skrifvars, I. Harjunkoski and **R. Pörn** 357 An extended cutting plane method for a class of non-convex MINLP problems

J. M. Zamora and **I. E. Grossmann** 367 A global MINLP optimization algorithm for the synthesis of heat exchanger networks with no stream splits

S. Sen, S. Narasimhan and **K. Deb** 385 Sensor network design of linear processes using genetic algorithms

E. C. Martinéz and **G. A. Pérez** 391 A project-oriented production model of batch plants

H. E. Musch, G. W. Barton, T. A. G. Langrish and **A. S. Brooke** 415 Nonlinear model predictive control of timber drying

J. Li and **R. R. Rhinehart** 427 Heuristic random optimization

A. A. Alonso, J. R. Banga and **R. Perez-Martin** 445 Modeling and adaptive control for batch sterilization

F. I. C. C. Pais and **A. A. T. G. Portugal** 459 A mathematical model for non-catalytic liquid-solid reversible reactions

NUMBER 4–5

J. E. Tolsma and **P. I. Barton** 475 On computational differentiation

K.-U. Klatt and **S. Engell** 491 Gain-scheduling trajectory control of a continuous stirred tank reactor

S. J. Qin 503 Recursive PLS algorithms for adaptive data modeling

M. Brinkmann, M. Schäfer, H.-J. Warnecke and **J. Prüss** 515 Modelling reactive absorption processes via film-renewal theory: numerical schemes and stimulation results

M. R. Riley, F. J. Muzzio and **S. C. Reyes** 525 Calculation of effective diffusivities and reactivities in immobilized cell systems using finite different methods

J. A. Wójcik and **A. G. Jones**	535	Dynamics and stability of continuous MSMPR agglomerative precipitation: numerical analysis of the dual particle co-ordinate model
V. M. Saucedo and **M. N. Karim**	547	Real time optimal feeding in a fermenvor using a Markot decision algorithm
J. Chen and **J. A. Romagnoli**	559	A strategy for simultaneous dynamic data reconciliation and outlier detection
T. Westerland, I. Harjunkoski and **J. Isaksson**	563	Solving a production optimization problem in a paper-converting mill with MILP
W. Morton and **C. Collingwood**	571	An equation analyser for process models
S. C. Patwardhan and **K. P. Madhaven**	587	Nonlinear internal model control using quadratic prediction models
J. R. Banga, R. Irizarry-Rivera and **W. D. Seider**	603	Stochastic optimization for optimal and model-predictive control
D. V. Sridhar, E. B. Bartlett and **R. C. Seagrave**	613	Information theoretic subset selection for neural network models
J. Markoš, M. Pisu and **M. Morbidelli**	627	Modeling of gas-liquid reactors. Isothermal semi-batch and continuous stirred tank reactors
J. Chen, A. Bandoni and **J. A. Romagnoli**	641	Outlier detection in process plant data
J. Acevedo and **E. N. Pistikopoulos**	647	Stochastic optimization based algorithms for process synthesis under uncertainty
M. Turkay and **I. E. Grossmann**	673	Structural flowsheet optimization with complex investment cost functions
Q.-G. Wang, C.-C. Hang and **W. Zou**	687	Automatic tuning of nonlinear PID controllers for unsymmetrical processes
A. Nooraii and **J. A. Romagnoli**	695	Implementation of advanced operational and control techniques for a pilot distillation column within a dcs environment
V. Ravi, P. J. Reddy and **D. Dutta**	709	Application of fuzzy nonlinear goal programming to a refinery model

NUMBER 6

SPECIAL ISSUE ON DESIGN OF CHEMICAL COMPOUNDS

M. L. Mavrovouniotis	713	Design of chemical compounds
E. N. Pistikopoulos and **S. K. Stefanis**	717	Optimal solvent design for environmental impact minimization

C. Bruneton, C. Hoff and **P. I. Barton**	735	Thermal stability analysis via elucidation of hazardous reaction stoichiometries
V. S. Raman and **C. D. Maranas**	747	Optimization in product design with properties correlated with topological indices
J. L. Klepeis, I. P. Androulakis, M. G. Ierapetritou and **C. A. Floudas**	765	Predicting solvated peptide conformations via global minimization of energetic atom-to-atom interactions
B. W. Schug and **M. J. Realff**	789	Analysis of waste vitrification product-process systems
R. Vaidyanathan, Y. Gowayed and **M. El-Halwagi**	801	Computer-aided design of fiber reinforced polymer composite products
F. Friedler, L. T. Fan, L. Kalotai and **D. Dallos**	809	A combinatorial approach for generating candidate molecules with desired properties based on group contribution

NUMBER 7–8

M. R. Galli and **J. Cerdá**	819	Synthesis of structural-constrained heat exchanger networks — I. Series networks
R. Gonzalez and **M. J. Realff**	841	Operation of pipeless batch plants — I. MILP schedules
R. Gonzalez and **M. J. Realff**	857	Operation of pipeless batch plants — II. Vessel dispatch rules
M. L. Luyben and **B. D. Tyréus**	867	An industrial design/control study for the vinyl acetate monomer process
M. G. Sneesby, M. O. Tadé and **T. N. Smith**	879	Steady state transitions in the reactive distillation of MTBE
S. Kiil and **S. K. Bhatia**	893	Solution of adsorption problems involving steep moving profiles
G. Han and **G. P. Rangaiah**	897	A method for multiphase equilibrium calculations
E. L. Russell and **R. D. Braatz**	913	Model reduction for the robustness margin computation of large scale uncertain systems
R. Dunia and **S. J. Qin**	927	A unified geometric approach to process and sensor fault identification and reconstruction: the unidimensional fault case
Y. Arkun and **F. Kayihan**	945	A novel approach to full CD profile control of sheet-forming processes using adaptive PCA and reduced-order IMC design
D. J. Ternet and **L. T. Biegler**	963	Recent improvements to a multiplier-free reduced Hessian successive quadratic programming algorithm

R. R. Iyer and **I. E. Grossmann**	979	Synthesis and operational planning of utility systems for multiperiod operation
D. J. Greeff and **C. Aldrich**	995	Empirical modelling of chemical process systems with evolutionary programming
G. M. Ostrovsky, Yu. M. Volin and **D. V. Golovashkin**	1007	Optimization problem of complex system under uncertainty
M. R. Galli and **J. Cerdá**	1017	Synthesis of structural-constrained heat exchanger networks — II split networks
J.-W. Bok, S. Park and **H. M. Lee**	1037	Robust investment model for long-range capacity expansion of chemical processing networks under uncertain demand forecast scenarios
J. Zhang, A. J. Morris and **E. B. Martin**	1051	Long-term prediction models based on mixed order locally recurrent neural networks
M. Soroush and **S. Valluri**	1065	Multivariable nonlinear controller synthesis in discrete-time
Q. T. Pham	1089	Dynamic optimization of chemical engineering processes by an evolutionary method
H. Surmann and **J. Huser**	1099	Automatic electropolishing of cobalt chromium dental cast alloys with a fuzzy logic controller
H. A. B. Braake, E. J. L. Van Can, J. M. A. Scherpen and **H. B. Verbruggen**	1113	Control of nonlinear chemical processes using neural models and feedback linearization
J. L. Spencer, R. Gunde and **S. Hartland**	1129	Computation of interface shape and maximum force in surface tension measurements
	I	Instructions for Contributors

NUMBER 9

	1135	Preface
C. S. Adjiman, S. Dallwig, C. A. Floudas and **A. Neumaier**	1137	A global optimization method, αBB, for general twice-differentiable constrained NLPs — I. Theoretical advances
C. S. Adjiman, I. P. Androulakis and **C. A. Floudas**	1159	A global optimization method, αBB, for general twice-differentiable constrained NLPs — II. Implementation and computational results
J. R. Paloschi	1181	Using sparse bounded homotopies in the SPEEDUP simulation package
J. R. Paloschi	1189	Steps towards steady-state process simulation on MIMD machines: Implementation in the SPEEDUP simulator

V. S. Vassiliadis and **S. A. Brooks**	1197	Application of the modified barrier method in large-scale quadratic programming problems
J. Z. Hua, J. F. Brennecke and **M. A. Stadtherr**	1207	Reliable computation of phase stability using interval analysis: Cubic equation of state models
O. J. Schraa and **C. M. Crowe**	1215	The numerical solution of bilinear data reconciliation problems using unconstrained optimization methods
M. Türkay and **I. E. Grossmann**	1229	Tight mixed-integer optimization models for the solution of linear and nonlinear systems of disjunctive equations
W. F. Feehery and **P. I. Barton**	1241	Dynamic optimization with state variable path constraints
C. Loeblein and **J. D. Perkins**	1257	Economic analysis of different structures of on-line process optimization systems
M. H. Bauer and **J. Stichlmair**	1271	Design and economic optimization of azeotropic distillation Processes using mixed-integer nonlinear programming
X. Zhang and **R. W. H. Sargent**	1287	The optimal operation of mixed production facilities — extensions and improvements
J. M. Pinto, A. Türkay, B. Bolio and **I. E. Grossmann**	1297	STBS: A continuous-time MILP optimization for short-term scheduling of batch plants
J. Strube and **H. Schmidt-Traub**	1309	Dynamic simulation of simulated-moving-bed chromatographic processes
K. P. Papalexandri, E. N. Pistikopoulos and **B. Kalitventzeff**	1319	Modelling and optimization aspects in energy management and plant operation with variable energy demands-application to industrial problems
A. Szücs, M. Gerzson and **K. M. Hangos**	1335	An intelligent diagnostic system based on Petri nets
R. Srinivasan and **V. Venkatasubramanian**	1345	Automating HAZOP analysis of batch chemical plants: Part I. The knowledge representation framework
R. Srinivasan and **V. Venkatasubramanian**	1357	Automating HAZOP analysis of batch chemical plants: Part II. Algorithms and application

NUMBER 10

V. S. Parekh and **P. M. Mathias**	1371	Efficient flash calculations for chemical process design — extension of the Boston–Britt "Inside–out" flash algorithm to extreme conditions and new flash types

S.-H. Sun and **T. R. Marrero**	1381	An object-oriented programming approach for heat and mass transfer related finite element analyses
D. R. Lewin	1387	A generalized method for HEN synthesis using stochastic optimization — II. The synthesis of cost-optimal networks
C. A. Meyer and **C. L. E. Swartz**	1407	A regional convexity test for global optimization: Application to the phase equilibrium problem
A. Meghlaoui, J. Thibault, R. T. Bui, L. Tikasz and **R. Santerre**	1419	Neural networks for the identification of the aluminium electrolysis process
S. Rahman and **S. Palanki**	142	State feedback synthesis for on-line optimization of batch reactors with multiple manipulated inputs
M. J. Kurtz and **M. A. Henson**	1441	State and disturbance estimation for nonlinear systems affine in the unmeasured variables
C. Azzaro-Pantel, L. Bernal-Haro, P. Baudet, S. Domenech and **L. Pibouleau**	1461	A two-stage methodology for short-term batch plant scheduling: discrete-event simulation and genetic algorithm
J. K. Won and **M. Modarres**	1483	Improved Bayesian method for diagnosing equipment partial failures in process plants
D. R. Lewin, H. Wang and **O. Shalev**	1503	A generalized method for HEN synthesis using stochastic optimization — I. General framework and MER optimal synthesis
P. J. Thomas, S. Bhattacharyya, A. Patra and **G. P. Rao**	1515	Steady state and dynamic simulation of multi-stage flash desalination plants: A case study

NUMBER 11

M. Pérez, R. Font and **C. Pastor**	1531	A Mathematical model to simulate batch sedimentation with compression behavior
T. J. McAvoy	1543	A methodology for screening level control structures in plantwide control systems
J. D. Kelly	1553	On finding the matrix projection in the data reconciliation solution
T. Friese, P. Ulbig and **S. Schulz**	1559	Use of evolutionary algorithms for the calculation of group contribution parameters in order to predict thermodynamic properties. Part 1: Genetic algorithms
B. Lennox, P. Rutherford, G. A. Montague and **C. Haughin**	1573	Case study investigating the application of neural networks for process modelling and condition monitoring
M. Ratto	1581	A theoretical approach to the analysis of PI-controlled CSTRs with noise
G. B. Ferraris and **D. Manca**	1595	BzzOde: a new C++ class for the solution of stiff and non-stiff ordinary differential equation systems

M. T. de Gouvèa and **D. Odloak**	1623	A new treatment of inconsistent quadratic programs in a SQP-based algorithm
D. I. Wilson, M. Agarwal and **D. W. T. Rippin**	1653	Experiences implementing the extended Kalman filter on an industrial batch reactor
S. Viswanathan, C. Johnsson, R. Srinivasan, V. Venkatasubramanian and **K. E. Ärzen**	1673	Automating operating procedure synthesis for batch processes: Part I. Knowledge representation and planning framework
S. Viswanathan, C. Johnsson, R. Srinivasan, V. Venkatasubramanian and **K. E. Ärzen**	1687	Automating operating procedure synthesis for batch processes: Part II. Implementation and application
A. Elkamel	1699	An artificial neural network for predicting and optimizing immiscible flood performance in heterogeneous reservoirs
J. Lee, W. Cho and **T. F. Edgar**	1711	Multiloop PI controller tuning for interacting multivariable processes
J. H. Jung, C. H. Lee and **I. B. Lee**	1725	A genetic algorithm for scheduling of multi-product batch processes

NUMBER 12

R. Taylor, K. Achuthan and **A. Lucia**	1731	Complex domain distillation calculations
S. Bandyopadhyay, R. K. Malik and **U. V. Shenoy**	1733	Temperature—enthalpy curve for energy targeting of distillation columns
R. Spotnitz	1745	Literate programming
J. M. Zamora and **I. E. Grossmann**	1749	Continuous global optimization of structured process systems models
J. D. Kelly	1771	A regularization approach to the reconciliation of constrained data sets
M. J. Bagajewicz and **Q. Jiang**	1789	Gross error modeling and detection in plant linear dynamic reconciliation
C. Johnsson and **K.-E. Årzén**	1811	Grafchart for recipe-based batch control
H. Skrifvars, S. Leyffer and **T. Westerlund**	1829	Comparison of certain MINLP algorithms when applied to a model structure determination and parameter estimation problem

A. Garrard and **E. S. Fraga**	1837	Mass exchange network synthesis using genetic algorithms
Y. H. Kim, W. H. Kwon and **Y. I. Lee**	1851	Min–Max generalized predictive control with stability
B. R. Bakshi and **U. Utojo**	1859	Unification of neural and statistical modeling methods that combine inputs by linear projection
D. Manca, M. Rovaglio, G. Pazzaglia and **G. Serafini**	1879	Inverse Response Compensation and Control Optimization of Incineration Plants with Energy Production
P. R. Prasad, J. F. Davis, Y. Jirapinyo, J. R. Josephson and **M, Bhalodia**	1897	Structuring diagnostic knowledge for large-scale process systems
K. F. McBrayer, T. A. Soderstrom, T. F. Edgar and **R. E. Young**	1907	The application of nonlinear dynamic data reconciliation to plant data
V. Hanagandi and **M. Nikolaou**	1913	A hybrid approach to global optimization using a clustering algorithm in a genetic search framework

LIST OF CONTENTS

ESCAPE-8 Supplement

xvii Introduction

ORAL COMMUNICATIONS

Molecular Modeling

J. L. Klepeis, M. G. Ierapertritou and C. A. Floudas — S3 Protein folding and peptide docking: a molecular modeling and global optimization approach

E. C. Marcoulaki and A. C. Kokossis — S11 Molecular design synthesis using stochastic optimisation as a tool for scoping and screening

J. K. Maranas, M. Mondello, G. S. Grest, S. Kumar, P. G. Debenedetti and W. W. Graessley — S19 A molecular dynamics study of intermolecular structure, thermodynamics and miscibility in hydrocarbon polymers

M. E. Sheehan and P. N. Sharratt — S27 Molecular dynamics methodology for the study of the solvent effects on a concentrated Diels-Alder reaction and the separation of the post-reaction mixture

Separations

M. Barolo, G. B. Guarisa, S. A. Rieazi and A. Trotta — S37 Understanding the dynamics of a batch distillation column with a middle vessel

Y. S. Cheng, E. Alpay and L. S. Kersbenbaum — S45 Simulation and optimisation of a rapid pressure swing reactor

C. B. Batistella and M. R. Wolf Maciel — S53 Recovery of carotenoids from palm oil by molecular distillation

J. E. Tolsma and P. I. Barton — S61 Computation of heteroazeotropes

M. Sharif, N. Shah and C. C. Pantelides — S69 On the design of multicomponent batch distillation columns

E. McCarthy, E. S. Fraga and J. W. Ponton — S77 An automated procedure for multicomponent product separation synthesis

Reactors and Kinetics

M. P. Bollyn and A. R. Wright — S87 Development of a process model for a batch reactive distillation — a case study

A. Baltsas, E. Papadopoulos and C. Kiparisaides — S95 Application and validation of the pseudo-kinetic rate content method to high pressure LDPE tubular reactors

T.-Y. Park and G. F. Froment — S103 A hybrid genetic algorithm for the estimation of parameters in detailed kinetic models

A. Highler, R. Taylor and R. Krishna — S111 Modeling of a reactive separation process using a nonequilibrium stage model

V. L. Mehta and A. C. Kokossis — S119 New generation tools for multiphase reaction systems: a validated systematic methodology for novelty and design automation

H. Hatzantonis and C. Kiparissides — S127 The effect of the mean particle size on the dynamic behaviour of catalyzed olefin polymerization fluidized bed reactors

Process Synthesis and Integration

P. Radgen, E. J. Pedernera, M. Patel and R. Reimert — S137 Simulation of process chains and recycling strategies for carbon based materials using a conventional process simulator

K. P. Papalexandri, D. I. Patslatzis, E. N. Pistikopoulos and L. Ebbesen	S141	Heat integration aspects in a crude preheat refinery section
F. Maréchal and B. Kalitventzeff	S149	Process integration: selection of the optimal utility system
I. E. Grossmann, H. Yeomans and Z. Kravanja	S157	A rigorous disjunctive optimization model for simultaneous flowsheet optimization and heat integration
Optimization		
F. Uesbeck, N. J. Samsatli, L. G. Papageorgiou and N. Shah	S167	Robust optimal fermentation operating policies
A. M. Strouvalia, S. P. Mavromatis and A. C. Kokossis	S175	Conceptual optimization of utility networks using hardware and comprehensive hardware composites
S. Galán and P. I. Barton	S183	Dynamic optimization of hybrid systems
M. Tvrzská de Gouvêa and D. Odloak	S191	One-layer real time optimization of LPG production in the FCC unit: procedure, advantages and disadvantages
D. J. Kyriakopoulou and E. Kalitventzeff	S199	Interior point techniques for the constrained simulation problem
A. Pertsinidis, I. E. Grossmann and G. J. McRae	S205	Parametric optimization of MILP programs and a framework for the parametric optimization of MINLPs
W. R. Esposito and C. A. Floudas	S213	Parameter estimation in nonlinear algebraic models via global optimization
M. P. Avraam, N. Shah and C. C. Pantelides	S221	Modeling and optimisation of general hybrid systems in the continuous time domain
B. Gross and P. Roosen	S229	Total process optimization in chemical engineering with evolutionary algorithms
Industrial Applications		
G. Heyen, B. Vrielynck and B. Kalitventzeff	S239	Application of C. A. P. E. techniques to the revamping of existing electrical power plants: an example of interdisciplinary collaboration
M. H. Lee, S. J. Lee, C. Han, K. S. Chang, S. H. Kim and S. H. You	S247	Hierarchical on-line data reconciliation and optimization for an industrial utility plant
J. L. A. Koolen	S255	Simple and robust design of chemical plants
T. Tahmassebi	S263	An approach to management of multilevel distribution systems for consumer goods and chemicals industry under information uncertainty
M. Badell, J. M. Nougués and L. Puigjaner	S271	Integrated on line production and financial scheduling with intelligent autonomous agent based information system
G. Rotstein, N. Shab, E. Sorensen and S. Macchietto	S279	Analysis and design of paint manufacturing processes
Computational Fluid Dynamics		
T. F. McKenna, D. Cokljat and P. Wild	S285	CFD modelling of heat transfer during gas phase olefin polymerisation
Z. Jaworski and J. Dudczak	S293	CFD modelling of turbulent macromixing in stirred tanks. Effect of the probe size and number on mixing indices
B. G. M. van Wachem, J. C. Schouten, R. Krishna and C. M. van den Bleek	S299	Eulerian simulations of bubbing behaviour in gas–solid fluidised beds
R. Vázquez-Román	S307	A model based on average velocity for gas production pipes simulation

D. Maggioris, A. Goulas, A. H. Alexopoulos, E. G. Chatzl and C. Kiparissides	S315	Use of CFD in prediction of particle size distribution in suspension polymer reactors
J. L. Afonso and M. J. Clifton	S323	Numerical model of a mixed flow coupled with mass and heat transfer in continuous flow electrophoresis
Modeling and Simulation		
M. C. Georgiadis, G. E. Rotstein and S. Macchietto	S331	Modeling and simulation of complex plate heat exchanger arrangements under milk fouling
D. Petrides, R. Cruz and J. Calandranis	S339	Optimization of wastewater treatment facilities using process simulation
C. Laquerbe, J. C. Laborde, P. Floquet, L. Pibouleau and S. Domenech	S347	Identification of parametric models based on residence time distribution theory
S. K. Bermingham, H. J. M. Kramer and G. M. van Rosmalen	S355	Towards on-scale crystalliser design using compartmental models
R. Gani, T. S. Jepsen and E. S. Pérez-Cisneros	S363	A generalized reactive separation unit model. Modeling and simulation aspects
L. U. Kreul, A. Górak, C. Dittrich and P. I. Barton	S371	Dynamic catalytic distillation: advanced simulation and experimental validation
J. Tontain, J. M. Le Lann, C. Gourdon and X. Joulia	S379	Maxwell–Stefan approach coupled drop population model for the dynamic simulation of liquid–liquid extraction pulsed column
Process Control and Operation		
M. Nakaiwa, K. Huang, M. Owa, T. Akiya, T. Nakane and T. Takamatsu	S389	Operating an ideal heat integrated distillation column with different control algorithms
M. Graells, J. Cantón, B. Peschaud and L. Puigjaner	S395	General approach and tool for the scheduling of complex production systems
K. L. Yee and N. Shah	S403	Improving the efficiency of discrete time scheduling formulation
Y. Cao, D. Rossiter, D. W. Edwards, J. Knechtel and D. Owens	S411	Modelling issues for control structure selection in a chemical process
M. G. Ierapetritou and C. A. Floudas	S419	Short-term scheduling: new mathematical models vs algorithmic improvements
P. Mizsey, N. T. Hau, N. Benko, L. Kalmar and Z. Fonyo	S427	Process control for energy integrated distillation schemes
X. Chen, R. W. Pike, T. A. Hertwig and J. R. Hopper	S435	Optimal implementation of on-line optimization
G. Févotte, T. F. McKenna, S. Othman and A. M. Santos	S443	A combined hardware/software sensing approach for on-line control of emulsion polymerisation processes
Y. Sampath, S. Palanki and J. C. Cockburn	S451	Robust nonlinear control of polymethylmethacrylate production in a batch reactor
F. Tadeo, A. Holohan and P. Vega	S459	$l1$-optimal regulation of pH control plant
R. H. Nyström, K. V. Sandström, T. K. Gustafsson and H. T. Toivonen	S467	Multimodel robust control applied to a pH neutralization process
I. P. Miletic and T. E. Marlin	S475	Results diagnosis for real-time process operations optimization

S. H. Yang and P. W. H. Chung S483 Life cycle hazard analysis for computer controlled processes

F. Flehmig, R. v. Watzdorf and W. Marquardt S491 Identification of trends in process measurements using the wavelet transform

Process Design

H. Schmidt-Traub, M. Köster, T. Holtkötter and N. Nipper S499 Conceptual plant layout

G. Athier, P. Floquet, L. Pibouleau and S. Domenech S505 A mixed method for retrofiting heat-exchanger networks

P. M. Herder and M. P. C. Weijnen S513 Quality criteria for process design in the design process — industrial case studies and an expert panel

C. G. Vassiliadis and E. N. Pistikopoulos S521 Reliability and maintenance considerations in process design under uncertainty

Education and Thermodynamics

S. Goh, B. Chang, I. Jeong, H.-T. Kwon and I. Moon S531 Safety improvement by a multimedia operator education system

J. Manninen and X. X. Zhu S537 Thermodynamic analysis and mathematical optimisation of power plants

A. J. G. G. Graveland and E. Gisolf S545 Exergy analysis: an efficient tool for process optimization and understanding

Intelligent Processing

K. J. Mo, S. Eo, D. Shin and E. S. Yoon S555 Qualitative interpretation and compression of process data using clustering method

A. D. Dimitriadis, N. Shah and C. C. Pantelides S563 Efficient modelling of partial resource equivalence in resource-task networks

P. Z. Maguire, A. Struthers, D. M. Scott and W. R. Paterson S571 The use of agents both to represent and to implement process engineering models

T. Lohl, C. Schulz and S. Engell S579 Sequencing of batch operations for a highly coupled production process: genetic algorithms versus mathematical programming

K. Meert and M. Rijckaert S587 Intelligent modelling in the chemical process industry with neural networks: a case study

C. A. Oller Nascimento and R. Giudici S595 Neural network based approach for optimisation applied to an industrial nylon-6,6 polymerisation process

S. Viswanathan, L. Mockus, V. Venkatasubramanian, P. K. Basu, R. Mack, P. Cherukat and V. Iskos S601 *i*TOPS: an intelligent tool for operating procedures synthesis

POSTERS

Molecular Modelling

F. Fergg and F. J. Keil S611 Molecular dynamics calculations and Monte Carlo simulation of diffusivities in aqueous systems. Application to nitrate reduction on bimetal catalyst immobilized in poly (vinyl alcohol)-hydrogel

J. E. Ourique and A. Silva Telles S615 Computer-aided molecular design with simulated annealing and molecular graphs

Separations

I. M. Mojtaba and M. A. Hussain S621 Optimal operation of dynamic processes under process-model mismatches: application to batch distillation

M. Fikar, M. A. Latifi, F. Fournier and Y. Creff	S625	Control vector parametrisation versus iterative dynamic programming in dynamic optimisation of a distillation column
S. Karacan, H. Hapoglu and M. Alpbaz	S629	Generalized predictive control to a packed distillation column for regulatory problems
B. H. L. Betlem, R. W. M. Gotink and H. Bosch	S633	Optimal operation of rapid pressure swing adsorption with slop recycling
Y. Chung, B.-K. Na and H. K. Song	S637	Short-cut evaluation of pressure swing adsorption systems
H. F. Meier and M. Mori	S641	Gas–solid flow in cyclones: the Eulerian–Eulerian approach
A. Mehlborn, J. M. Nougués and L. Puigjaner	S645	Using rate-based approach under consideration of different contacting regimes for multicomponent batch distillation simulation
V. Nallet, D. Mangin and J. P. Klein	S649	Model identification of batch precipitations: application to salicylic acid
Z. Lelkes, P. Lang and M. Otterbein	S653	Feasibility and sequencing studies for homoazeotropic distillation in a batch rectifier with continuous entrainer feeding
Reactors & Kinetics		
V. V. Kafarov, V. N. Pisarenko, C. G. Dallos, F. Keil, B. Mayorga and M. Nunez	S659	New method for computer aided analysis of steady-state multiplicity of catalytic processes
V. V. Kafarov, V. N. Pisarenko, C. G. Dallos, F. Keil and L. Acevedo Duarte	S663	Computer aided method for construction of kinetic models of chemical reactions, based on application of Chebyshev-herimte polynomials
T. Schulzke, S. Schlüter and P.-M. Weinspach	S667	Experimental studies and simulation of the dynamic behaviour of bubble column reactors
A. R. J. Esparta, T. Obertopp and E. D. Gilles	S671	Synthesis of isothermal fluid–fluid two-phase CSTR networks
M. R. Rahimpour, P. Bahri, J. Fathi Kaljahi, A. Jahanmiri and A. Romagnoli	S675	A dynamic kinetic model for methanol synthesis on deactivated catalyst
C. G. Dassori	S679	Three-phase reactor modeling with significant back-mixing in the liquid phase using a modified cell model (MCM)
E. De Paola and P. Duverneuil	S683	Simulation of silicon deposition from SiHC13 in a CVD barrel reactor at atmospheric pressure
M. Farza, H. Hammouri, C. Jaliut, V. Chouri and J. Liéto	S687	Nonlinear estimation strategies for parameter estimation in chemical reactors
D. Casanave, K. Fiaty and J. A. Dalmon	S691	Computer-aided optimisation of catalytic dehydrogeneration in packed-bed membrane reactor
P. A. Afonso, J. M. Tavares and J. A. Castro	S695	Improving safety of a pilot plant reactor using a model based fault detection and identification scheme
D. Semino and L. Tognotti	S699	Modeling and sensitivity analysis of pyrolysis of biomass particles in a fluidized bed
A. Flores-Tlacuahuac and A. Silva-Beard	S703	Effect of process design/operation on the open-loop operability of a polymerization reactor
I. Lovik, M. Hillestad and T. Hertzberg	S707	Long term dynamic optimization of a catalytic reactor system
R. Maciel Filho and C. McGreavy	S711	Computer aided design for large scale multitubular reactors
S. M. Khuu, J. A. Romagnoli, P. A. Bahri and G. Weiss	S715	Dynamic simulation and control of an industrial surfactant reactor

N. J. Scenna, C. A. Ruiz and S. J. Benz	S719	Dynamic simulation of startup procedures of reactive distillation columns
M. Mussati, P. Aguirre and N. J. Scenna	S723	Modeling of real biological reactors for the treatment of complex substrates. Dynamic simulation
Process Synthesis & Integration		
P. W. H. Chung and M. Jefferson	S729	The integration of accident databases with computer tools in the chemical industry
I. Yongsunthon and E. Alpay	S733	Design and optimisation of temperature cycled adsorptive reactors
E. Batista, M. I. Rodrigues and A. J. Meirelles	S737	Optimization of a secundary reflux and vaporization (SRV) distillation process using surface response analysis
A. Alva-Argáez, A. C. Kokossis and R. Smith	S741	Wastewater minimisation of industrial systems using an integrated approach
A. Structhers and R. Curwen	S745	A new approach to integrated process systems engineering — the VIBE agent environment
Computational Fluid Dynamics		
E. Espi, Ph. Berne and P. Duverneull	S751	Using CFD to understand the air circulation in a ventilated room
L. Rudniak	S755	Numerical simulation of chemical vapour deposition process in electric field
L. Fradette, H. Z. Li, L. Choplin and P. Tanguy	S759	3D finité element simulation of fluid flow through a SMX static mixer
J. J. N. Alves and M. Mori	S763	Fluid dynamic modelling and simulation of circulating fluidized bed reactors: analyses of particle phase stress models
C. van Gulijk	S767	Using computational fluid dynamics to calculate transversal dispersion in a structured packed bed
Process Design		
V. Sampath and S. Palankl	S773	Optimization of isothermal-isobaric chemical vapor infiltration
L. Bernal-Haro, C. Azzaro-Pantel, S. Domenech and L. Pibouleau	S777	Design of multipurpose batch chemical plants using a genetic algorithm
J. W. H. Hawtin and P. W. H. Chung	S781	Concurrent engineering system for supporting STEP based activity model
B. G. Lakatos and R. Auer	S785	Two-level model based design of solids processing systems
S. B. Petkov and C. D. Maranas	S789	Design of multiproduct batch plants under demand uncertainty with staged capacity expansions
Y. Makwana, R. Smith and X. X. Zhu	S793	A novel approach for retrofit and operations management of existing total site
E. Orbán Mihályko and B. G. Lakatos	S797	Intermediate storage in batch processing systems under stochastic equipment failures
A. Vecchietti and M. Montagna	S801	Alternatives in the optimal allocation of intermediate storage tank in multi-product batch plants
H. C. Riksheim and T. Hertzberg	S805	A hybrid strategy for dynamic process flowsheeting
R. Lakshmanan and R. Bañares-Alcántara	S809	Retrofit by inspection using thermodynamic process visualisation
M. R. Galli and J. Cerdá	S813	A designer-controlled framework for the synthesis of heat exchanger networks involving non-isothermal mixers and multiple units over split streams

V. Bansal, J. D. Perkins and E. N. Pistikopoulos — S817 — Flexibility analysis and design of dynamic processes with stochastic parameters

Process Control & Operation

H. Wang, Y. Oh and E. S. Yoon — S823 — Strategies for modeling and control of nonlinear chemical processes using neural network

H. Vedam, V. Venkatsubramanian and M. Bhalodia — S827 — A B-spline based method for data compression, process monitoring and diagnosis

S. H. Yang, P. W. H. Chung, X. Z. Wang and C. McGreavy — S831 — Multi-objective constraint control for FCC reactor-regenerator system

N. Mata, T. Alvarez and C. de Prada — S835 — State space constrained multivariable predictive control of a milk of lime blending tank

M. Alpbaz, H. Hapoglu and C. Güresinli — S839 — Application of nonlinear generalised minimum variance control to a tubular flow reactor

C. Palmer and P. W. H. Chung — S843 — Eliminating ambiguities in qualitative causal feedback

E. Sanmarti, F. Friedler and L. Puigjaner — S847 — Combinatorial technique for short term scheduling of multipurpose batch plants based on schedule-graph representation

F. Jia, E. B. Martin and A. J. Morris — S851 — Non-linear principal components analysis for process fault detection

G. Dünnebier, S. Engeil, K.-U. Klatt, H. Schmidt-Traub, J. Strube and I. Weirich — S855 — Modeling of simulated moving bed chromatographic processes with regard to process control design

A. C. Costa, T. L. M. Alves, A. W. S. Henriques, R. Maciel Filho and E. L. Lima — S859 — An adaptive optimal control scheme based on hybrid neural modelling

B. Chang, S. Lee, H. Kwon and I. Moon — S863 — Rigorous industrial dynamic simulation of a crude distillation unit considered valve tray rating parameters

E. C. Dechechi, L. F. L. Luz Jr., A. J. Assis, M. R. W. Maciel and R. Maciel Filho — S867 — Interactive supervision of batch distillation with advanced control capabilities

Ö. Samikoglu, S. J. Honkomp, J. F. Pekny and G. V. Reklaitis — S871 — Sensitivity analysis for project planning and scheduling under uncertain completions

S. Kowalewski, S. Engell, R. Huuck, Y. Lakhnech, B. Lukoschus and L. Urbina — S875 — Using model-checking for timed automata to parameterize logic control programs

A. M. Eliceche, M. Sanchez and L. Fernandez — S879 — Feasible operating region of natural gas plants under feed perturbations

L. Özkan and M. C. Çamurdan — S883 — Model predictive control of a nonlinear unstable process

G. Music and D. Matko — S887 — Simulation support for recipe driven process operation

Modeling & Simulation

E. C. Martinez and J. A. Wilson — S893 — A hybrid neural network — first principles approach to batch unit optimisation

E. S. Fraga — S897 — Simulation of a fixed bed system using a geometrically based adaptive grid method

F. Rouvet, K. Fiaty, P. Laurent and J. K. Liou — S901 — Modeling and simulation of membrane fouling in batch ultrafiltration on pilot plant

M. A. Latifi, F. Lesage and N. Midoux — S905 — A two-zone model for liquid-to-wall mass transfer in a packed-bed reactor with single phase liquid flow

E. Rój and M. Wilk	S909	Simulation of an absorption column performance using feed-forward neural networks in nitric acid production
H. M. Verbeek, L. Fürst and H. Neumeister	S913	Digital simulation of an electrodeionization process
H. Singh, R. Smith and X. X. Zhu	S917	Economic achievement of environmental regulation in chemical process industries
S. Negny, M. Meyer and M. Prevost	S921	Simulation of velocity fields in a falling film with a free interface flowing over a wavy surface
J. Elsey, G. W. Barton, S. Jungk, G. Francis, J. Sellahewa and C. Chessarí	S925	Acoustics based on-line quality estimation
E. Rascol, M. Meyer, J. M. Le Lann and M. Prevost	S929	Numerical problems encountered in the simulation of reactive absorption: DAE index reduction and consistent intialisation
J. Soetjahjo, Y. G. Go and O. H. Bosgra	S933	Diag — a structural diagnose tool for interconnection assignment in model building and re-use
Optimization		
R. Altissimi, A. Brambilla, A. Deidda and D. Semino	S939	Optimal operation of a separation plant using artificial neural networks
F. Jalali	S943	Process simulation using continuation method in complex domain
B. P. Das, N. Shah and P. W. H. Chung	S947	Off-line scheduling a simple chemical batch process production plan using the ILOG scheduler
T. I. Dimkou and K. P. Papalexandri	S951	A parametric optimization approach for multiobjective engineering problems involving discrete decisions
V. Dua and E. N. Pistikopoulos	S955	An outer-approximation alogorithm for the solution of multiparametric MINLP problems
Intelligent Processing		
R. Srinivasan and V. Venkatasubramanian	S961	Multi-perspective models for process hazards analysis of large scale chemical processes
R. González-García, R. Rico-Martinez and I. G. Kevrekidis	S965	Identification of distributed parameter systems: a neural net based approach
B. Kránicz, M. Gerzson and K. M. Hangos	S969	Invariant inheritance in structured operating procedures described by petri nets
B. H. Chen, X. Z. Wang and C. McGreavy	S973	On-line operational support system for faults diagnosis in process plants
Z. Calderón, A. Espuña and L. Puigjaner	S977	Waste analysis and minimization in batch and semibatch reactor operation through dynamic simulation and neural networks
H. C. Aguiar and R. Maciel Filho	S981	Modelling and optimization of pulp and paper processes using neural networks
H. Torvi and T. Hertzberg	S985	Methods for evaluating uncertainties in dynamic simulation — a comparison of performance
F. A. Cubillos and E. L. Lima	S989	Adaptive hybrid neural models for process control

C. M. L. Castell, R. Lakshmanan, J. M. Skilling and R. Bañares-Alcântara	S993	Optimisation of process plant layout using genetic algorithms
T. Koiranen, T. Virkki-Hatakka, A. Kraslawski and L. Nyström	S997	Hybrid, fuzzy and neural adaptation in case-based reasoning system for process equipment selection
G. P. J. Schmitz and C. Aldrich	S1001	Neurofuzzy modelling of chemical process systems with ellipsoidal radial basis function neural networks and genetic algorithms
M. Ronen, Y. Shabtai and H. Guterman	S1005	Rapid process modeling — model building methodology combining unsupervised fuzzy-clustering and supervised neural networks
M. Hurme and M. Dohnal	S1009	Synthesis of qualitative models by using intelligent feedback
P. Zhang and Y. Qian	S1013	Fuzzy modeling and flowsheeting of imprecise units
Industrial Application		
I. Harjunkoski and T. Westerlund	S1019	Enlarging the trim-loss problem to cover the raw paper mill
D. Dempf and T. List	S1023	On-line data reconciliation in chemical plants
C. W. Schmidt, I. E. Grossmann and G. E. Blau	S1027	Optimization of industrial scale scheduling problems in new product development
C. Alhéritière, N. F. Thornhill, S. Fraser and M. J. Knight	S1031	Cost benefit analysis of refinery process data: case study
J. Plácido and L. V. Loureiro	S1035	Industrial application of data reconciliation
L. F. L. Moro, A. C. Zanin and J. M. Pinto	S1039	A planning model for refinery diesel production
KEYNOTE LECTURES		
M. Neurock and E. W. Hansen	S1045	First-principles-based molecular simulation of heterogeneous catalytic surface chemistry
H. H. Mayer and H. Schoenmakers	S1061	Application of CAPE in industry — status and outlook
R. Perne and A. Endesfelder	S1071	Process analysis, design and control — a case study
A. Wolff, M. J. Groebel and R. Janowsky	S1073	SitEModelling™: a powerful tool for total site energy optimization
L. Brochard	S1085	Hardware and software perspectives in engineering computing
	S1089	Authors' index

AUTHOR INDEX FOR SUPPLEMENT ISSUE 22/13
